

PERSONAL PROTECTIVE EQUIPMENT

onexia.com/personal-protective-equipment

Keeping employees safe is the number one priority in every industry as the economy comes back to life amid the global pandemic caused by Covid-19.

ONExia is here to help by providing modular solutions designed to keep your personnel safe within the workplace as shelter in place orders begin to be lifted.

Modular Kitted Shields, Partitions & Rooms

Our team of engineers can provide simple, off the shelf solutions and custom designs ready to ship in as little as 3 days that provide the visibility and protection needed for employee to employee and employee to customer interaction.

All our products, both off-the-shelf and custom, are constructed from light but strong aluminum extrusion material. Partitions feature a lightweight profile and a clear polycarbonate panel to protect those on both sides of the shield.

The durable polycarbonate panels are easily spray-cleaned, offering a quickly sanitized, comfortable solution for all. T-slots in the extrusion make it easy to attach bins, equipment mounts, and other devices.

DISCLAIMER: these products are not rated by any health organization. Please practice all recommended CDC precautions along with the use of Personal Protective Equipment

Each kit comes with all of the needed hardware and directions with most assemblies taking under an hour to construct.

All of our standard products are priced below. For a custom unit please **Contact our Sales Engineers** with your dimensions.

AISLE & DESK PROTECTORS

Keep both sides protected! Our aisle and desk protectors are designed to create a temporary sanitary divider that is safe, sturdy and can be repositioned as floor layouts change.

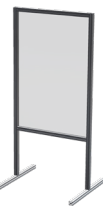

- Panel: 50.5" x 34.5"
- Overall height: 51"
- Clear polycarbonate panel
- Optional: Leveling feet or locking casters
- Price: \$296
